

J.G. Finneran Associates, Inc. was founded in 1977 by Jerry and Jo Finneran. In 1985, Jerry, a mechanical engineer, invented a micro sample vial combining a plastic outer shell and a glass limited volume insert. This design combined what was then considered "traditionally incompatible materials" - glass and plastic - to create an economical vial capable of holding limited sample volumes. Today, their company continues to create unique sample vials and accessories.

VIALS

Snap Seal™ Vials-Patented
2ml, clear or amber, 12x32mm, 11mm neck

Versa Vials

Big Mouth Crimp Top Vials
2ml, clear or amber, 12x32mm, 11mm neck

Versa Vial Plugs

ACCESSORIES

Snap Racks™

(4)

Snap Racks™ are constructed of durable glass reinforced polypropylene, with a center well to conveniently hold caps, seals, septa, etc. Racks snap together securely to double your rack capacity.

Universal Vial Rack System -Rack & Trays

(6)

Increased spacing allows the user to pipet samples or attach caps without removing the vials from the rack! Frames are made of polypropylene and insert trays are made of transparent PETG. Select the insert for your vial, pop it into the frame, and use!

Crimpers/Decappers

(12) 9300-11

Multi-Plug Safety Sleeve

(2)

The Multi-Plug Safety Sleeve is available in clear K-resin or black glass reinforced polypropylene. Use it as a tool to make plug and shell vial assembly easier and safer. The safety sleeve is "Multi" useful because it is designed to work with 1 mL, 2 mL or 4 mL shell vials. One Safety Sleeve works with all three sizes.
