

KJY-010 Vortex

Being of the compact design, no noise and easy for operation, the product has two functions of continuous and inching, which is suitable for blending of the blood routine (anticoagulation tube, 820 sample cup and 900 sample cup etc.) with character of full mixing and no damage to the blood cells. Comparing to the manual operation, it is more convenient and also can be used for liquid mixing in other containers.

Main Technical Data

Voltage: 220V \pm 10% (50Hz)

Power rating: 40W

Shaking frequency: Continuous 2800r/m

Inching 2800r/m

External Dimension: \varnothing 105x142mm

Cat No: KJY-010

Price: \$195.00 each

Freight: \$20.00

All prices exclude GST

KJY-011 Vortex

The economical vortex mixer is in a wide range of operation, there are two kinds of working plate: rubber and plastic. It can be used for liquids mixing in different test tubes, flasks, beakers. Dual mode switch makes the vortex work continuously or in inching. The speed of both models could be adjusted according to different requirements. High efficiency and low noise.

Main Technical Data

Voltage: 220V \pm 10% 50/60Hz

Power rating: 50W

Working method: Continuous ,inching, speed adjustable

Speed: 2800r/m

Working plate: Bowl shape, Disc shape

External dimension: 170x120x170mm

Cat No: KJY-011

Price: \$395.00 each

Freight: \$20.00

All prices exclude GST
